

## ENERGY MANAGEMENT

The Board encourages and supports an energy conservation and energy education program in the school district to help reduce energy consumption, reduce operating costs and improve the learning environment. Each district employee and student shall actively participate in the conservation efforts in order to comply with Board policy, which recognizes energy and operations efficiency as major capital and operating budget priorities. Every effort will be made to maintain programs for the benefit of students. The district administrators shall implement, direct, monitor, evaluate and report district energy conservation efforts. In addition, energy education programs should be incorporated in the appropriate areas of the district's curriculum.
