NIXA PUBLIC SCHOOLS

10 YEAR MASTER FACILITIES PLAN 2017-2027

This document is a guide for the district. All final decisions on projects will be made at the time of a bond issue and will be dependent on funding growth of the district.

NEW FACILITIES

At present (2017), there is no need for immediate plans for a new elementary, junior high, or high school. The District will continue to monitor growth rates. Classroom infills will be a priority along with FEMA shelters when funding is available. Relocation of the SCORE Campus of the High School is under study and consideration.

MODIFICATIONS TO EXISTING FACILITIES

The 2017-2027 Master Facility Plan calls for numerous modifications to existing facilities. Future Bond Issues will provide needed funding. An estimated 3% average yearly growth should provide the following bonding capacity:

2019 \$6 - 6.75M

2022 \$6 - 6.75M

2025 \$6 - 6.75M

Total Estimated Available Funding: \$18 - \$20.25M
